REGULATORY COMPLIANCE REPORT

AuraComply Audit Kernel v1.4.0

Product ID:	system_audit	**Client:**	AuraComply_HQ
Generated:	2026-05-23T19:28:39+00:00	**Classification:**	OFFICIAL / AUDIT USE

1. OPERATIONAL INTEGRITY SEAL — DORA Compliance

This report is generated from immutable traces recorded by the AuraComply audit kernel. Any modification of the original logs would invalidate the cryptographic integrity hash below. Compliance with DORA Art. 17 (ICT-related incident management) is demonstrated through an unbroken SHA-256 chain across all audit events.

SHA-256 Traceability Mirror Hash:

89f56945401a7a37f48bc5e5f0086c9e2958a81e73f0a0591eff648e20ada680

This hash covers the complete audit mirror log. Any tampering with even a single event produces a different hash, making alterations immediately detectable.

2. XAI AUDIT — Decision Explainability (EU AI Act Art. 13)

Breakdown of critical processed events during the self-certification run. Each step includes the technical and human rationale required by Art. 13 of the EU AI Act (transparency of high-risk AI systems). All checks executed twice across two independent certification cycles.

Timestamp	Check	Result	Rationale / Evidence
18:39:22	check_integrity	✓ PASS	hash[:16]=9edcb150642839bc — deterministic, chain intact
18:39:22	check_db_connec	✓ PASS	SELECT 1 OK — database connectivity confirmed
18:39:22	check_clients_t	✓ PASS	All required columns present (6 total)
18:39:22	check_audit_log	✓ PASS	Schema matches DORA query expectations
18:39:22	check_rls_enabl	✓ PASS	Row-Level Security enabled on audit_logs
18:39:22	check_no_plaint	✓ PASS	All api_token_hash entries are 64-char hex (no plaintext)
18:39:22	certify_verdict	✓ PASS	Cycle 1 — all checks passed
19:28:39	certify_start	—	Starting integrity self-certification run (Cycle 2)
19:28:39	check_integrity	✓ PASS	hash[:16]=9edcb150642839bc — deterministic, chain intact
19:28:39	check_db_connec	✓ PASS	SELECT 1 OK — database connectivity confirmed
19:28:39	check_clients_t	✓ PASS	All required columns present (6 total)
19:28:39	check_audit_log	✓ PASS	Schema matches DORA query expectations
19:28:39	check_rls_enabl	✓ PASS	Row-Level Security enabled on audit_logs
19:28:39	check_no_plaint	✓ PASS	All api_token_hash entries are 64-char hex (no plaintext)
19:28:39	certify_verdict	✓ PASS	Cycle 2 — all checks passed

3. PRIVACY CERTIFICATION — GDPR Art. 32(1)(b)

In accordance with Article 32(1)(b) of the GDPR (EU 2016/679) — integrity and confidentiality of processing — this audit record is strictly limited to operational metadata. **No PII (Personally Identifiable Information) is stored or processed** within the AuraComply audit trail. API tokens are stored exclusively as SHA-256 hashes (confirmed above:

check_no_plaint). Traces are sealed with the SHA-256 hash from Section 1 to guarantee tamper-evident integrity.

OVERALL VERDICT: ✓ ALL CHECKS PASSED — SYSTEM COMPLIANT
